

So you are thinking of redecorating, remodeling or you're moving...and decisions need to be made. WHERE TO START?! Start with what inspires you.

Where to find your inspiration: You might have a glass paper weight that was your fathers' and is dear to your heart. Perhaps there is a photo in a magazine that speaks to you most. Maybe you have always loved yellow but never had the courage to incorporate it into your home. These little nuggets of insight are what our designers love most because we can base the style and feel of the room off the inspiration that you bring us!

Articulating your personal style preferences can be difficult. Where do you begin? What terms do you use? Don't worry about words like "traditional," or "art deco." Stick with descriptors. Circle at least seven words that describe the space you would want to live in. Then put lines through words that do not describe that space:

airy	luminous	relaxing
fresh	crisp	floral
bold	masculine	restful
friendly	daring	romantic
bright	minimal	rustic
fun	dark	sensual
calming	modern	serene
glowing	delicate	simple
casual	interesting	sleek
gracious	different	soft
charming	natural	solid
grand	distinguished	soothing
cheery	neutral	sophisticated
happy	dramatic	sparse
classic	open	stable
harmonious	dynamic	stately
clean	opulent	striking
humorous	easy	strong
cluttered	overstuffed	stylish
informal	eclectic	subtle
colorful	pampering	tailored
intimate	elegant	textured
comfortable	personal	timeless
invigorating	ethnic	traditional
contemporary	powerful	tranquil
inviting	exciting	tropical
cool	pretty	understated
surprising	exotic	unique
cosmopolitan	pristine	utilitarian
light	feminine	versatile
country	quiet	vibrant
lived-in	formal	warm
cozy	refreshing	whimsical

Combined with your inspiration items or photos, the list above will help develop a picture of your individual furniture preferences. It will be particularly useful when you bring it in to work with one of Tiffany Home Design's Interior Design Professionals. We look forward to talking with you about the possibilities!
